What Worked well (to be written by observer)	Write a list of things to consider (to be written by observer & observee)
<p>* Hmaw - the class responded well to that you appreciate them for their contributions ✓ ("Great Thanks Henry, spot on Seth")</p> <p>* Power point notes were good, clear and to the point ✓</p> <p>* "Remember when we looked at the tropics last week" — drawing on previous lessons context ✓</p>	<p>- you told them that today they were learning about Deserts but didn't tell them what the lesson was going to look like: Eg. Today's lesson 1/ etc... on board</p> <p>- I think you lost a few 2/ of them with the quick questioning (keep in mind a few of them have processing problems). Perhaps if you had told them what to look for prior to the clip.</p>

**2 Stars and a Wish (2 things that worked well and something that you'd like to improve on for next observation):**

**Star:** managing David's outbursts/comments & keeping the lesson flowing // ☆

**Star:** Clear objectives that were met ✓ // ☆

**Wish:** Planning some more teaching strategies to engage the diverse needs of the whole class

- you asked them about Australian deserts but when they couldn't tell you any besides the Simpson you didn't use that opportunity to tell them more / explore any Atlas etc....

**Prompts for Professional Conversation**

- This is what I noticed working well....
- What were the highlights for you? Why?
- Did you achieve what you set out to do?
- What were the challenges? Why?
- What career stage do you believe yourself to be in terms of your goal and standard? Why do you think this? (graduate, proficient, highly accomplished, lead)
- What would you like to focus on for the next lesson observation?
- What can we work on together?
